Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 66-67, , 69-70, 72, 73, 75-76, drawn to isoform "S " of HELA2 (testisin serine proteinase), its homologs and compositions comprising said products, classified in class 435, subclass 219.
- II. Claims 66, 68, 71-72, 74-76, drawn to isoform "L " of said HELA2, its homologs and compositions comprising said products, classified in class 435, subclass 219.
- III. Claims 66,72, 75-76, drawn to serine proteinase encoded by SP001LA gene, its homologs and compositions comprising said products, classified in class 435, subclass 219.
- IV. Claims 66, 72, 75-76, drawn to serine proteinases encoded by SP002LA gene, its homologs and compositions comprising said products, classified in class 435, subclass 219.
- V. Claims 66, 72, 75-76, drawn to serine proteinases encoded by SP003LA, its homologs and compositions comprising said products classified in class 435, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-V are patentably distinct each from the other because each inventions is directed to a product of unrelated chemical structure and function.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
